

REMARKS

The claims as originally numbered were restricted as between Group I, Claims 1-28 and Group II, claims 29-38. Applicant hereby elects Group I. After the claims have been renumbered, Group I corresponds to claims 1-31 and Group II corresponds to claims 32-41. Applicant elects Group I, claims 1-31, with traverse.

The Examiner then required an Election of Species as between 7 species and a further selection between 8 subspecies. Applicant elects Species II, and subspecies A, with traverse. The following claims correspond to Applicant's election: 1, 3, 4, 5-7, 12, 14, 16-18, 21-23, 25, 27, and 30.

In addition, Applicant respectfully requests that the subject matter designated as Species V and VI should also be considered with Applicant's election. That is, the features presented were not presented in isolation, but rather in conjunction with the embodiments disclosed. The lumens provided are intended to be incorporated into the various embodiments illustrated, including Species II. The claims that correspond to Species V and VI include 8-10 and 31.

Should any issues remain outstanding, the Examiner is respectfully urged to telephone the undersigned to expedite prosecution.

Respectfully submitted,

Date: 5/11/03
